

please fulfill your mandate to assure fair use of the public airwaves by broadcasters. sinclair broadcasting is abusing it's license by forcing broadcast of only one point of view regarding john kerry's actions re. the viet nam war. in doing so they are attempting to influence the outcome of a national election...over-riding the voting process with propaganda. many would consider kerry's actions the best of example of citizenship in a democracy...not for content but for the fact that he exercised his rights responsibly in the public forum. sinclair is undermining responsible citizenship with partisan programming at my expense. i am divesting my 401k myself of any sinclair holdings...i expect the fcc to do their job as my representatives. sinclairs license needs to be reviewed without partisanship.
